INSCA

The automatic hopper scale INSCA is used for the gravimetric weighing of granular products. This legal-for-trade silo scale delivers exceptional accuracy and unique reliability, thanks to its innovative drive and control technology.

Type	Diameter mm	Height Scale mm	Height Inlet Hopper mm	Height Outlet Hopper mm	Wheat t/h
* 400	900	1910	1117	1605	100
* 600	900	2230	1267	1925	130

* available as a tandem version

The silo scale INSCA is a discontinuous hopper scale designed for in-house process control, with a capacity of up to 175m³ per hour. Energy-efficient electromechanical drive systems minimize wear and reduce maintenance requirements. SWISCA load cells ensure exceptional measurement accuracy. The control system, featuring a touch screen, is user-friendly, reliable, and robust.

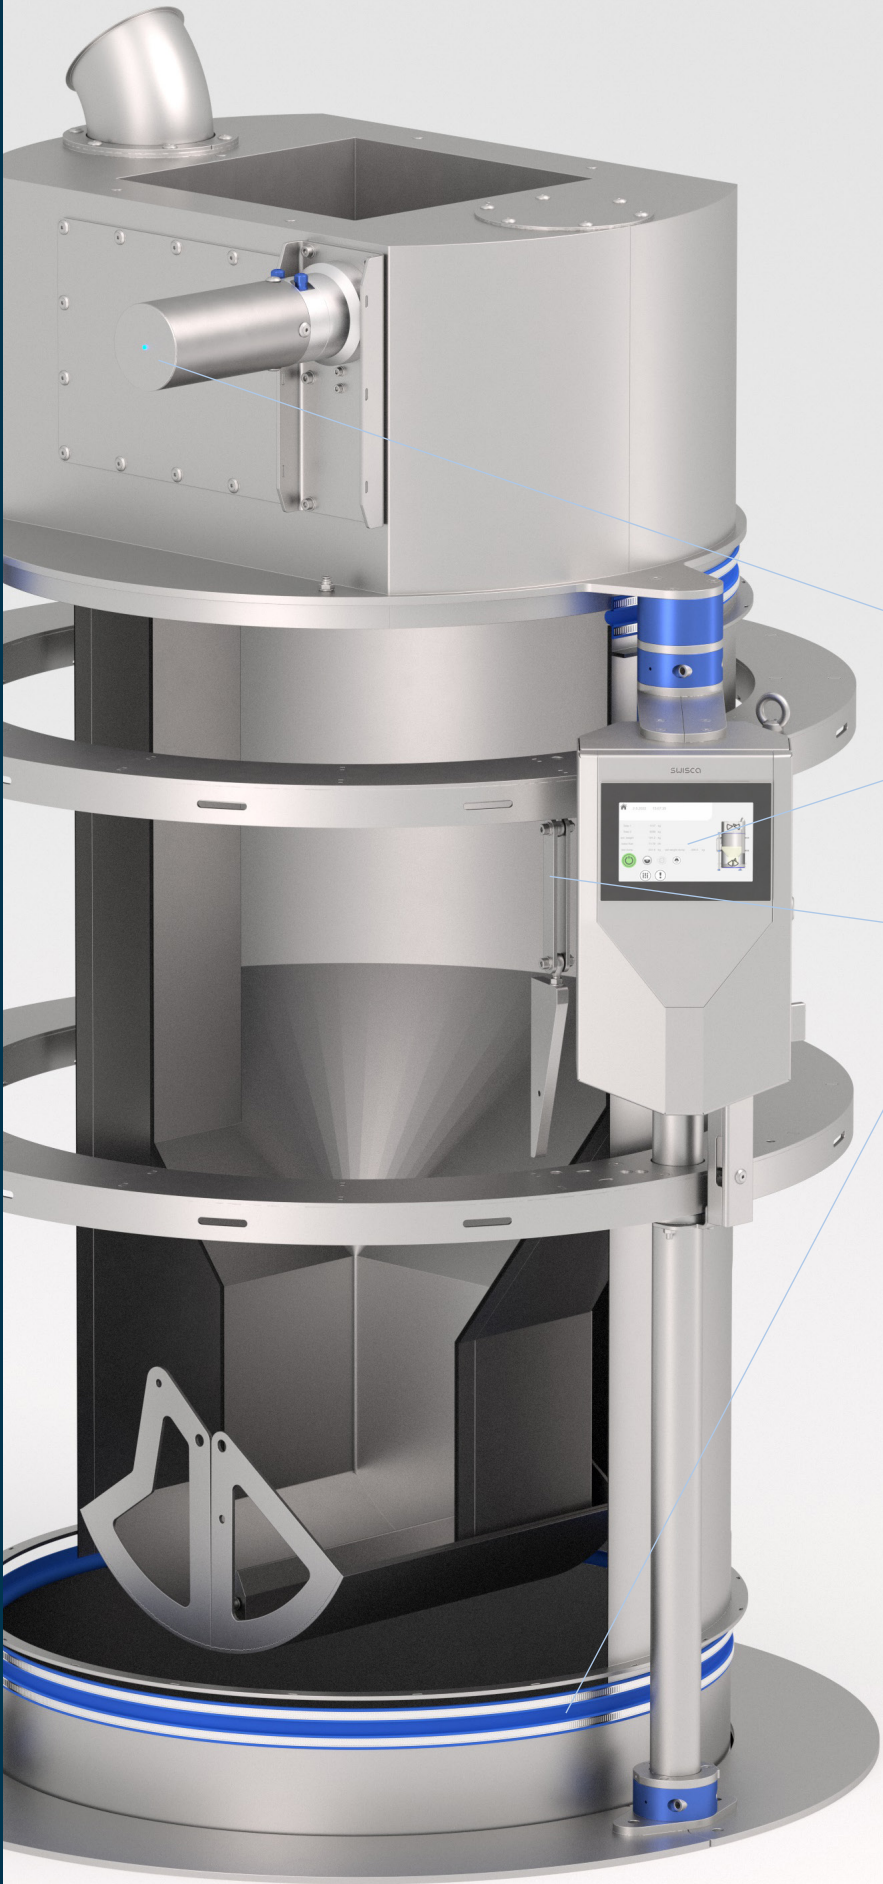

Option

Inlet hopper

Discharge hopper with slide gate

Benefits

- + Accurate and reliable weighing
- + Energy-efficient function
- + Hygienic design

Energy-efficient servo drives

IoT-compatible control system with intuitive touch screen operation

High-quality load cells

Metal detectable connections
